Suez, Egypt

Military Status: Postponed

PROFESSIONAL SUMMARY

Software Developer and **Backend & Full Stack Engineer** with hands-on experience building production-oriented web, mobile, and business applications using **PHP (Laravel)**, **Python**, **JavaScript**, and **SQL**. Experienced in **RESTful API development**, **relational database design**, **system integration**, **debugging**, and **performance optimization**. Delivered business management systems, cross-platform mobile applications, and **workflow automation** solutions across professional, freelance, and remote environments. Strong understanding of the **SDLC**, **clean code**, **software testing**, **Agile** collaboration, and **Git/GitHub** version control.

TECHNICAL SKILLS

Programming Languages: PHP, Python, JavaScript, Dart, SQL, C, C#, Java.

Backend Development: PHP (Laravel), Node.js, Express.js, RESTful API Development, API Integration, Authentication & Authorization, RBAC, MVC Architecture.

Databases: MySQL, PostgreSQL, MongoDB, Prisma ORM, Database Design, Relational Schema Design, SQL Query Optimization.

Software Engineering: Object-Oriented Programming (OOP), Data Structures, Algorithms, SDLC, Clean Code, Debugging, Code Review, Performance Optimization, Manual & Automated Testing, STLC.

Frontend Development: React.js, Next.js, Vue.js, HTML5, CSS3, Bootstrap, Tailwind CSS, ShadCN, Responsive Web Design.

Mobile Development: Flutter, Dart, Firebase, Cross-Platform Application Development, Push Notifications.

Automation & Integration: N8N, Workflow Automation, GoHighLevel, CRM Integration, Webhooks, Web Scraping, Third-Party API Integration.

Version Control, Cloud & Tools: Git, GitHub, Agile, Scrum, Jira, Vercel, Firebase, cPanel, Deployment, Figma, Postman, GitHub Copilot, Cursor, Claude AI.

PROFESSIONAL EXPERIENCE

Freelance Software Developer (Web & Mobile) | Mostaqi.com & Nafezly.com | Remote

November 2024 – Present

- Deliver end-to-end software for remote clients, owning requirements analysis, **backend development**, **database design**, **deployment**, and maintenance.
- Developed the **Mawaqet** cross-platform mobile ecosystem in **Flutter** and **Dart**, integrating **REST APIs** and **Firebase** cloud services.
- Implemented **real-time chat**, **push notifications**, an E-Wallet (Coins) module, and a multimedia social feed through **third-party API integration**.
- Built bilingual (Arabic/English) interfaces with dark and light modes, applying **clean code** and **responsive design** practices.

Software Developer Intern | Aray International | Suez, Egypt

April 2026 – June 2026

- Contributed to **backend development** of core modules for internal business applications alongside a team of engineers.
- Developed and integrated **REST APIs**, supporting **system integration** between internal services and third-party platforms.
- **Debugged** defects and applied **performance optimization**, improving application stability and maintainability.
- Participated across the **SDLC** — **software testing**, **code reviews**, and deployment — in an **Agile** team using **Git/GitHub**.

Automation Specialist (GoHighLevel) | Prof Health | Remote

January 2026 – April 2026

- Engineered **CRM workflow automation** in **GoHighLevel**, automating lead management, customer follow-up, and email and WhatsApp communication sequences.
- Integrated CRM, messaging, and marketing platforms via **third-party API integration** and **webhooks**, enabling **data synchronization** across systems.
- Replaced manual processes with reliable, auditable automated workflows, improving operational efficiency and data accuracy.

Software Engineer | PeakBurger | Suez, Egypt

September 2025 – January 2026

- Engineered a full-stack Restaurant Management System with an integrated **POS** platform using **PHP (Laravel)** and **MySQL**, covering order, inventory, and delivery workflows.
- Designed a normalized **relational database schema** and developed secure **REST APIs** enforcing **data integrity** across order and inventory operations.
- Developed a real-time **admin dashboard** for order management, inventory monitoring, and daily sales and delivery reporting.
- Applied **SQL query optimization** and **performance optimization**, reducing manual entry errors and improving delivery workflow efficiency.
- Delivered a **responsive** customer interface for menu browsing, ordering, and delivery tracking, supported by structured **software testing**.

Front-End Web Development Intern | Elevvo Pathways | Remote

August 2025 – October 2025

- Built responsive web interfaces and **reusable components** with **Next.js**, **React.js**, and **Tailwind CSS** in an **Agile** team.
- Implemented **state management** with **React Hooks** and the **Context API** for “TaskFlow,” a task app with drag-and-drop and real-time updates.
- **Debugged** front-end issues and improved **cross-browser compatibility** and accessibility.

Practical Software Training & Projects | WE School of Applied Technology | Suez, Egypt

September 2022 – July 2025

- Completed structured practical training in **programming fundamentals**, **full stack development**, **relational database design**, **software testing**, and the **SDLC**; collaborated on team-based projects using **Git/GitHub**, technical documentation, **code review**, and technical presentations.
- School Management System & Task Tracker Application**: developed database-driven applications for student records, grades, attendance, **authentication**, session management, and complete **CRUD** operations.
- Full-Stack E-Commerce Platform & WE School Website**: built responsive web applications covering product management, categories, search, shopping cart, **authentication**, order workflows, and structured school information.
- Additional Technical Projects**: developed Berimbolo Security, Discover Egypt, Image Gallery, Music Player, and World Wide Clock; designed high-fidelity UI/UX prototypes in **Figma** and applied responsive design, **JavaScript** DOM manipulation, event handling, and dynamic UI rendering.

SELECTED PROJECTS

Swapo | Marketplace Platform (Web, Android & iOS)

Marketplace ecosystem connecting individuals and merchants across Saudi Arabia. Contributed to the **Laravel backend architecture** and **REST API** layer serving a web app and cross-platform Android and iOS clients — merchant accounts, user profiles, listings, categories, search, **real-time chat**, and notifications — on a normalized **MySQL relational database design**. **Technologies**: PHP, Laravel, MySQL, REST APIs, JavaScript, Flutter.

Integrated Restaurant & Delivery System | Multi-Application Ecosystem

Multi-application ecosystem — customer ordering app, kitchen display, and courier app — running against a **shared Laravel backend** for **multi-branch operations**. Developed **order lifecycle** services and real-time tracking, using **REST APIs** for **system integration** so state changes propagate consistently across all three clients. **Technologies**: Laravel, PHP, MySQL, REST APIs.

Professional POS System | Full Stack Business Solution

Business-critical **Point of Sale** system handling **transaction processing**, product and **inventory management**, and **stock tracking**. Designed the transactional **database schema** enforcing **data integrity** across concurrent sales, and implemented barcode integration, thermal receipt printing, invoice generation, and financial reporting. **Technologies**: Laravel, PHP, MySQL, REST APIs.

Mawaqeeet | Islamic Lifestyle & Social Application

Cross-platform app that evolved from a utility tool into a social platform. Implemented location-aware prayer-time computation, sensor-driven Qibla direction, and scheduled **push notifications**, then extended it with **real-time chat**, a multimedia feed, and an **E-Wallet (Coins)** module backed by **Firebase** and **REST APIs**, with Arabic/English localization and dark/light theming. **Technologies**: Flutter, Dart, Firebase, REST APIs.

Mawaqeeet Admin Dashboard | Administration & Control Panel

Backend-heavy administration system governing the Mawaqeeet platform. Implemented **Role-Based Access Control (RBAC)**, **user management**, content moderation workflows, analytics reporting, and push notification management, exposed through **REST APIs** over a relational **MySQL** schema. **Technologies**: Laravel, PHP, MySQL, REST APIs.

Learning Management System (LMS) | E-Learning Platform

E-learning platform supporting course management, video delivery, progress tracking, quizzes, and **user management**. Developed the **backend**, **REST APIs**, and **database design** modeling courses, enrolments, and progress state, and integrated Stripe, PayPal, and Fawry **payment gateways**. **Technologies**: Laravel, React.js, Node.js, MySQL, REST APIs.

Real-Time Availability Monitoring & Alerting System | Python Automation

Python monitoring service tracking property availability changes in near real time and dispatching instant alerts on state transitions. Implemented **concurrent** network polling, **API integration**, structured **error handling**, and retry logic for reliable long-running detection. **Technologies**: Python, REST APIs, Web Scraping, Automation.

AI Chatbot Automation | Workflow Automation Platform

Automated support and sales workflows for e-commerce clients. Implemented **N8N** workflows integrating WooCommerce and Google Sheets via **API integration** and **webhooks**, handling order tracking and appointment scheduling as **business process automation**. **Technologies**: N8N, API Integration, WooCommerce, Google Sheets.

EDUCATION

Bachelor of Technology in Information Technology (B.Tech in IT) | New Cairo Technological University

October 2025 – Present | Expected Graduation: 2029

- Coursework: **Software Engineering**, **Data Structures & Algorithms**, **OOP**, **Database Systems**, Operating Systems, Computer Networks, Web Technologies, Cloud Computing, and Cybersecurity.
- Deliver **Agile** team projects using **Git**, **code reviews**, technical documentation, and presentations; participate in workshops and student technical activities.

Diploma in Software & Web Development | WE School of Applied Technology | Suez, Egypt

September 2022 – July 2025

- BTEC International Level 3** framework covering **Full Stack Web Development**, **Programming Fundamentals** (C, C#, Java), **PHP**, **JavaScript**, **MySQL**, **Database Management**, **Software Testing**, Networking, and **Figma**; included field training, industrial visits, team projects, technical workshops, and software competitions.

CERTIFICATIONS

BTEC International Level 3 Subsidiary Diploma in Information Technology — Pearson | August 2025

React JS — MaharaTech, ITI MOOCA | March 2025

React Basics — HackerRank | March 2025

Freelancer (Mostaqil) — MaharaTech, ITI MOOCA | February 2024
